

## Host Your Hybrid Meeting at the OLC

Sometimes attendees can't make it to your meeting in person. Or, maybe you'd like to extend the keynote to a larger audience of remote participants. Perhaps you need a stand-alone broadcast studio to record presentations or trainings for future events.

In an era where education has no physical boundaries, when you host your event at the OLC, it's easy to combine a real-time, face-to-face component with virtual elements for a hybrid meeting.

### HD Broadcast Video Studio

The OLC is Chicago's only meeting venue with an on-site and professional quality HD broadcast video studio. With our studio fully equipped with state-of-the-art technology to record and livestream audio and video virtually anywhere throughout the facility and even around the world, you can facilitate learning with audiences worldwide.

The dedicated studio space can be used in conjunction with the lab or meeting spaces as a demo area. It can also be rented hourly, half-day or full-day as a stand-alone studio for projects such as:

- Webinars/webcasts
- Interviews
- Corporate presentations
- Technical product demonstrations or training videos
- Promotional videos

In addition, this special video enabled demonstration area lets you transmit or record an up-close, more detailed view of a presentation than what direct observation permits – especially important in highly technical presentations and training sessions.

There is plenty of adjacent space for any video directors or clients to supervise the videotaping or broadcast.

The studio is supported by dedicated and experienced on-site technical professionals who ensure your entire production runs smoothly.

The studio includes:

- A spacious 589 sq ft studio
- Three HD broadcast cameras, with one on a camera crane to enable overhead shots
- Overhead grid and free standing lighting
- Broadcast-quality control room
- Blue curtain or curved CYC wall backdrop
- Teleprompter, digital recorders and comfort monitors
- Live video streaming capability

## On-Site AV Editing and Control Room

Our on-site AV production/editing suite provides a central hub for all high-definition video processing for all meeting and event spaces. It features:

- High-definition production switching
- Recording, editing and live video streaming capabilities
- Apple Pro Rez and MP4 recording formats
- Video conferencing
- Video archiving

To enhance on- and off-site collaborative learning and evaluation, a 144x144 HD routing platform allows all the OLC's video and audio signals to be routed from any source within the OLC to destinations around the world.

## Additional Venue Amenities

Our knowledgeable event and technical teams will work with you to ensure that your broadcast event coordination and shoot run smoothly.

Additional amenities include:

- On-site men's and women's locker rooms make it easy for participants to change their wardrobe and secure their personal belongings.
- Prep kitchen for food styling or participant catered meal set up
- First floor location for ease of access and equipment delivery
- Coat/luggage storage areas
- 24-hour building security
